#### Investment Strategy

Mobius Investment Trust plc's objective is to deliver long-term absolute returns by investing in emerging and frontier market equities. MMIT will identify companies with resilient business models which are undervalued and mispriced. MMIT does not use any benchmark and follows an active investment style by partnering with portfolio companies. This is achieved by engaging with stakeholders to improve corporate governance, set out a broader ESG pathway and act as a catalyst for wider operational and financial improvements.

## Investor Profile

Mobius Investment Trust plc has no required minimum holding period and is designed for long-term investment (at least five years). It is intended for both institutional and professional investors. MMIT invests in equities and it may therefore be subject to volatility. This requires an elevated risk tolerance and capacity.

## Opportunities

- + Focus on dynamic small and mid-sized companies in many of the fastest growing economies in the world
- + Fundamental bottom-up research process identifies resilient business models which are undervalued and mispriced
- + Lower ESG standards in emerging and frontier markets offer a unique opportunity for active engagement approach
- + Create value by delivering a clear ESG pathway for our portfolio companies
- + Concentrated portfolio allows a customised engagement strategy for each company

## Risks

- MMIT pursues an active management style. Its performance may therefore deviate considerably from that of a comparable market return
- Pronounced fluctuations in price are characteristic of emerging and frontier economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges
- Investments via Shanghai or Shenzhen Stock Connect are subject to additional risks, quota limitations, custody risk, clearing/settlement risk and counterparty risk
- Focusing intentionally on stocks in small and medium cap companies may entail additional risks (e.g. lower liquidity)

## Commentary

The Net Asset Value (NAV) of the Mobius Investment Trust (The Company) increased by 3.9% in June 2019, closing at 97.8p. The share price increased by 5.5% over the same period, with MMIT trading at a 2.4% premium on 30 June. Over the course of the month, there was an average premium to NAV of 1.6%.

As of 30 June 2019, the Company had allocated 80.6% of capital, with 21 holdings across 10 countries. As noted in May's factsheet, the increased cash position is attributable to three disposals over the last few months (please see Q2 2019 MMIT Manager Commentary for further details). In June, we exited our position in Oriflame Cosmetics following the announced takeover tender offer. MMIT's target cash level is around 5%, and current funds will be utilised to increase exposure to the highest conviction portfolio ideas and in the pipeline of new companies competing for entry into the portfolio. We have initiated two new positions in India and China, although are restricted from providing further details until we reach the target weight.

The MSCI Emerging Markets Index (GBP) was up 5.3% over June 2019, while the MSCI Frontier Markets Index (GBP) was up 1.2%.

In June, MMIT issued 1.1 million new shares as part of the ongoing tap issuance. Up to 18 July, 25.0% of the tap (5.0 million new shares) have been issued.

Further details are included in the accompanying Q2 2019 MMIT Manager Commentary which was also published on 24 July 2019, alongside the MMIT Interim Results. Both documents are available at <https://www.mobiusinvestmenttrust.com/>
