Investment Strategy

Mobius Investment Trust plc's objective is to deliver long-term absolute returns by investing in emerging and frontier market equities. MMIT will identify companies with resilient business models which are undervalued and mispriced. MMIT does not use any benchmark and follows an active investment style by partnering with portfolio companies. This is achieved by engaging with stakeholders to improve corporate governance, set out a broader ESG pathway and act as a catalyst for wider operational and financial improvements.

Investor Profile

Mobius Investment Trust plc has no required minimum holding period and is designed for long-term investment (at least five years). MMIT invests in equities and it may therefore be subject to volatility. This requires an elevated risk tolerance and capacity.

Opportunities

- + Focus on dynamic small and mid-sized companies in many of the fastest growing economies in the world
- + Fundamental bottom-up research process identifies resilient business models which are undervalued and mispriced
- + Lower ESG standards in emerging and frontier markets offer a unique opportunity for active engagement approach
- + Create value by delivering a clear ESG pathway for our portfolio companies
- + Concentrated portfolio allows a customised engagement strategy for each company

Risks

- MMIT pursues an active management style. Its performance may therefore deviate considerably from that of a comparable market return
- Pronounced fluctuations in price are characteristic of emerging and frontier economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges
- Investments via Shanghai or Shenzhen Stock Connect are subject to additional risks, quota limitations, custody risk, clearing/settlement risk and counterparty risk
- Focusing intentionally on stocks in small and medium cap companies may entail additional risks (e.g. lower liquidity)

Commentary

The Net Asset Value (NAV) of Mobius Investment Trust plc (the "Company") increased by 1.5% in September 2019, closing at 92.4p. The share price decreased by 2.0% over the same period, with the Company trading at a 6.7% discount on 30 September. Over the course of the month, there was an average discount to NAV of 5.3%.

In accordance with our discount management policy, the Company's Board has been notified that the average monthly discount has recently widened to more than 5.0% and discussions are ongoing to consider the most effective steps to ensure this is reduced.

As of 30 September 2019, the Company had allocated 85.8% of capital, with 20 holdings across 9 countries. Key positive contributors to the performance over this period were Mavi Giyim Sanayi ve Ticaret (1.2%), Lojas Americanas (0.5%) and Fleury (0.4%). The top three largest detractors to performance were Goodbaby International (-0.9%), Magma FinCorp (-0.6%) and eMemory Technology (-0.6%).

As long-term investors, we preach the merits of patience. Our aim remains to achieve a multi-year holding period for portfolio companies. However, in the last quarter, we exited from three holdings (CCC, Cosmecca and Matahari), after we had to lower our expectations regarding the initial investment thesis (please see the Q3 2019 manager commentary for further details). We have added two new holdings to our portfolio in the last quarter. Fleury is the second largest operator of diagnostics centres in Brazil. NICE Holdings is a South Korean credit bureau with several investments in payments and non-core industrial assets.

Over the same period, the MSCI Emerging Markets Index (GBP) was up (0.7%), the MSCI Emerging Markets Mid Cap Index (GBP) flat (0.0%) and the MSCI Frontier Markets Index (GBP) down (-2.12%).

Further details are included in the accompanying Q3 2019 MMIT Manager Commentary which was also published on 23 October 2019. It is available at <https://www.mobiusinvestmenttrust.com/>
