Investment Strategy

Mobius Investment Trust plc's objective is to deliver long-term absolute returns by investing in emerging and frontier market equities. The Fund manager aims to identify companies with resilient and innovative business models which are mispriced. The Fund follows an active investment style by partnering with portfolio companies. This is achieved by engaging with stakeholders to improve corporate governance and act as a catalyst for wider operational and financial improvements including a clear ESG pathway.

Investor Profile

Mobius Investment Trust plc has no required minimum holding period and is designed for long-term investment (at least five years). MMIT invests in equities and it may therefore be subject to volatility. This requires an elevated risk tolerance.

Opportunities

- + Focus on dynamic small and mid-sized companies in many of the fastest growing economies in the world
- + Fundamental bottom-up research process identifies resilient business models which are undervalued and mispriced
- + Lower ESG standards in emerging and frontier markets offer a unique opportunity for active engagement approach
- + Create value by delivering a clear ESG pathway for our portfolio companies
- + Concentrated portfolio allows a customised engagement strategy for each company

Risks

- MMIT pursues an active management style. Its performance may therefore deviate considerably from that of a comparable market return
- Pronounced fluctuations in price are characteristic of emerging and frontier economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges
- Investments via Shanghai or Shenzhen Stock Connect are subject to additional risks, quota limitations, custody risk, clearing/settlement risk and counterparty risk
- Focusing intentionally on stocks in small and medium cap companies may entail additional risks (e.g. lower liquidity)

Commentary

February saw global markets tumble as the world watched, in disbelief, as Russian troops invaded Ukraine. We would like to remind our investors that MMIT neither holds Russian assets nor any company with significant exposure to Russia. However, the current crisis will have global implications. Stock markets were already headed for a volatile first half of the year, driven by worries about high inflation, rising interest rates, supply chain bottlenecks, Covid-19 outbreaks and slowing growth. The war in Ukraine will probably prolong the phase of uncertainty, at least in the short term. We are monitoring the current developments and their potential impact on our portfolio companies very carefully. As long-term investors we continue to focus on the fundamental quality of our holdings which is driving the success of the strategy.

Amid the above-mentioned volatility, MMIT's NAV and share price fell by 1.4% and 4.0% respectively. MMIT traded at an average discount of 0.25% during February, closing at -4.5%. The strongest contributors to performance during the period were Taiwanese semiconductor companies ZillTek Technology (+0.8%) and eMemory (+0.8%), followed by Brazilian software business TOTVS (+0.7%). The largest detractors were Hong Kong-based EC Healthcare (-0.8%), Indian software company Persistent Systems (-0.7%) and Indian health care company Metropolis Healthcare (-0.4%)

On Monday, 7 March 2022, Carlos Hardenberg provided an update on the portfolio, strategy and performance of the Mobius Investment Trust, and shared his views on the implications of the Russia-Ukraine conflict.
